Research Interests

Human-AI Interaction · Human-AI Collaboration · Interactive & Immersive Systems, with a focus on AI that supports human exploration, reasoning, and decision-making.

Education

Kyung Hee University

B.M. in Media Studies, B.E. in Computer Science and Engineering

Seoul, S. Korea

Mar 2022 - Feb 2027 (Expected)

- GPA: 3.89/4.3 (overall), 3.9/4.3 (major)

University of Wollongong

Exchange Program, School of Computing and Information Technology

Wollongong, Australia

Feb 2025 - Jun 2025

Research Experience

Immersive Computing & Interaction Lab

Undergraduate Researcher, Advised by Professor Sungwon In

Kyung Hee University

Mar 2026 - Present

- Investigate **human interaction with large language models (LLMs) in virtual reality (VR)**, focusing on non-linear exploration and management of LLM conversations.
- Design and implement a VR interaction system using Unity and C# to support branching, navigating, and organizing LLM conversations.
- Design and conduct user studies to examine LLM interaction across VR and desktop environments.
- **Manuscript in preparation** for submission to the 26th IEEE International Symposium on Mixed and Augmented Reality (**ISMAR 2027**).

Publications

J. Chon, S. In (2026). A VR-Based Context Branching for Non-linear Exploration of LLM Conversations. Proceedings of the Korean Institute of Information Scientists and Engineers Conference (KCC 2026), 1757–1759.
Scientific Poster Presentation. Honorable Mention, Undergraduate/Junior Paper Competition.

Honors & Awards

2026	Honorable Mention , Undergraduate/Junior Paper Competition	Korean Computer Congress
2025	DACEP Scholarship , AUD 4,000, selected based on academic excellence	University of Wollongong
2023	Superiority Scholarship , awarded for academic excellence	Kyung Hee University

Projects

AI Feature Design for Kakao T, a Mobility Platform

UX Researcher

KHUX, Kyung Hee University

Mar 2026 – May 2026

- Led UX research using **user surveys (n=102) and in-depth interviews (n=9)** to investigate user pain points in ride matching and waiting within the existing Kakao T service.
- Synthesized research findings into key user needs and proposed AI-powered features to address identified pain points, translating them into user flows and interaction concepts.
- Designed high-fidelity mobile prototypes to communicate the proposed AI features and their end-to-end user interactions.

Usability Improvement for 'Riido', an IT project management tool

UX Researcher

KHUX, Kyung Hee University

Sep 2025 – Dec 2025

- Investigated usability improvements for Riido through a paid industry-academia project with startup SWYG, while preserving the existing product goals and core user flows.
- Conducted **heuristic evaluation, usability testing (n=8), and A/B testing** to identify and validate usability issues across key user flows.
- Evaluated potential improvements against the existing product structure and user flows, and developed high-fidelity prototypes of the selected solutions.

Social Media Service Design for Gen Z and Gen Alpha

UX/UI Designer

KHUX, Kyung Hee University

Sep 2025 – Dec 2025

- Developed a new social media service concept for a paid industry-academia project with Daum, balancing client requirements and business goals with user needs.
- Conducted user surveys and interviews to identify target-user needs and define the MVP scope and core service requirements.
- Designed end-to-end mobile user flows and built high-fidelity prototypes that demonstrated the proposed service as a realistic product experience.

Development of an Event Service Booking Platform

Frontend Developer

University of Wollongong

Feb 2025 – Jun 2025

- Developed React-based UI and implemented core features including real-time chat with STOMP.js, review system, and login/signup.
- Integrated REST APIs and collaborated with backend developers to connect frontend components with booking, communication, authentication, and review services.

Development of a Personal Finance Application

Frontend Developer

Cotato

Sep 2025 – Feb 2026

- Developed core frontend features using React and TypeScript based on product requirements defined by the PM.
- Collaborated with product managers, frontend and backend developers, and designers to translate product requirements into an integrated MVP.

Leadership & Activities

Student Association UX/HCI Club KHUX

Director · Education Team Leader

Seoul, S. Korea

Sep 2025 – Present

- Led and mentored junior members throughout UX/HCI project development.
- Contributed to industry-sponsored, MVP, and AI feature design projects within multidisciplinary UX/HCI teams.
- Developed educational materials and published UX-related articles for club members.

Cotato, Student Association IT/Coding Club

Frontend Developer

Seoul, S. Korea

Sep 2025 – Feb 2026

- Participated in technical study sessions covering React, TypeScript, and web development.
- Collaborated with project managers, designers, and backend developers on an MVP project.

Skills

Development

Design

Research

Languages

React, TypeScript, Unity, C#, Python, SQL

Figma, Framer, Wireframing, Prototyping, UX/UI Design

User Interviews, Surveys, Usability Testing, A/B Testing
